

<https://visualstudio.microsoft.com/visual-cpp-build-tools/>

The Microsoft C++ Build Tools provides MSVC toolsets via a scriptable, standalone installer without Visual Studio. Record libraries and applications targeting Windows from the command-line (e.g. as part of your continuous integration workflow). Visual Studio 2015 Update 3, Visual Studio 2017, Visual Studio 2019, and latest version of Visual Studio.

Visual Studio Build Tools 2022

17.12.4

The Visual Studio Build Tools allows you to build native and managed MSBuild-based applications without requiring the Visual Studio IDE. There are options to install the Visual C++ compilers and libraries, MFC, ATL, and C++/CLI support.
